# ANWAR SANCHEZ
## Full Stack Software Developer

✉ anwar.sofwaredev@gmail.com    💻 anwarsanchez.com

**Full Stack Software Developer | 5+ Years Experience**

Frontend Developer with expertise in React, TypeScript, and Next.js for building scalable web applications. Experienced developing high-performance applications with optimized component architecture, server-side rendering, and seamless API integrations using RESTful and GraphQL endpoints. Proficient in automated testing with comprehensive test coverage and CI/CD pipeline implementation for streamlined deployments. Proven track record in team leadership, mentoring developers, and delivering MVPs that validate product concepts and reduce development risk

## Work Experience

### BCD Meetings & Events | 2022 – PRESENT

Frontend Developer
- Developed high-performance React and TypeScript applications with focus on component architecture and scalable code organization.
- Built responsive web applications using Next.js, implementing server-side rendering and static site generation for optimal performance.
- Integrated RESTful and GraphQL APIs to create seamless data flows between frontend and backend systems.
- Implemented comprehensive automated testing frameworks including unit, integration, and end-to-end testing to ensure code reliability.
- Collaborated in CI/CD pipeline setup and maintenance, streamlining deployment processes and reducing time-to-production.

### Freelance | September 2024 - Present

Team Lead & Product Engineer
- Helped build MVPs and proof-of-concepts (PoCs) to test ideas quickly, reduce risk, and understand what users really need.
- Set up and maintained containerized backend infrastructure using Docker and Hasura, making services more scalable and easier to manage.
- Designed GraphQL APIs and planned database architecture to improve data querying, storage, and relationships.
- Guided development roadmap and mentored other developers through code reviews, clear API design, and TypeScript best practices.

### Hackathons & Public Speaking

Starknet Ignite Hackathon | May 2025
- Mentored development teams at Central America's largest blockchain hackathon, guiding Web3 and AI-powered solution development.
- Provided technical guidance on Starknet ecosystem implementations and smart contract architecture.
- Evaluated innovative projects addressing real-world problems through decentralized technologies.

Self-Awareness & Leadership at All-Team Meeting, Orlando | Mar 2025
- Participated in leadership development sessions focused on emotional intelligence and team optimization.
- Facilitated cross-functional collaboration workshops to align individual strengths with team objectives.
- Contributed insights on building high-performance development environments.

Ethereum Core Research & Development Workshop | Nov 2024
- Led technical discussions on Ethereum's roadmap including PeerDAS and Verkle Trees implementation.
- Researched Layer 2 scaling solutions and MEV optimization strategies.
- Delivered presentations on blockchain infrastructure to international developer audiences.

## Education

- Bachelor Software Engineer - UNED
- Advanced level of English (C2) - Centro Cultural Norte Americano
